

PROPOSED CLAIM AMENDMENT TO FILE WITH RCE

Claim 24 (currently amended): A method comprising the following steps performed by a server in the following order, comprising:

- (i) storing a font capabilities list for each of multiple client devices, each font capabilities list comprising a list of fonts for which the device has font structure data, the font structure data defining the structure in which text formatted with the respective font is to be rendered;
- (ii) receiving text data addressed to a designated one of the devices, the text data comprising text and font identifiers, the font identifiers identifying which fonts to use to render the text;
- (iii) comparing the font identifiers in the text data with the fonts in the capabilities list of the designated device, to determine the font identifiers for which the designated device lacks font structure data; and
- (iv) transferring the lacking font structure data and the text data to the designated device.

Claim 29 (new): A method comprising the following steps performed by a server in the following order:

- (i) storing a font capabilities list for each of multiple client devices, each font capabilities list comprising a list of fonts for which the device has font structure data, the font structure data defining the structure in which text formatted with the respective font is to be rendered;
- (ii) receiving text data addressed to a designated one of the devices, the text data comprising text and font structure data for rendering the text;
- (iii) determining, from the stored capabilities list for the designated device, whether the device already has the font structure data; and
- (iv) transferring the text to the device, and operatively refraining from transferring the font structure data to the device in response to determining, in step iii, that the device already has the font structure data.
